Dear RGRR Web Maker and the Hiring Team

I am Jhunguide Flores a 4th year BSIT student at Colegio De Santo Cristo De Burgos(CDSCDB). As a part of our curriculum i am required to complete a 300 hours On The Job Training Internship. I am very interested at the IT internship oppurtunity at RGRR Web Maker.

I have been focusing on front end development while progressively learning fullstack web development. I am profecient at using HTML,CSS,Javascript, version control such as Git and i enjoy creating seamless and responsive user interfaces. I am currently working with NodeJS, ExrpessJs and React Js. Also, I have completed a plenty of projects using VB.NET, Python and PHP before and I am eager to apply my skills to real-world projects while learning from experienced developers at RGRR Web Maker.

I would be grateful for the oppurtunity to contribute on your team and gain hands-on experience at the field of information technology and software development. I am curious on how can i apply my skills on a professional environment. I am available to start on August 19,2025 and can commit 20 hours per week. Thank you for considering my application. I look forward to the possibility of discussing how I can support your projects.

Sincerely,
Flores Jhunguide U.
